Field latex prices in Thailand remained broadly stable this week, although persistent rainfall and unsettled weather conditions in several producing regions continued to influence tapping activities. Trading activity remained limited, as customer demand was subdued due to the ongoing holiday season. At the same time, developments in the oil, commodity and equity markets continued to shape overall market sentiment. Market participants will keep a close watch on weather conditions and demand trends, as both could provide fresh direction for the natural rubber market in the weeks ahead.
