The rubber market consolidated this week, but firm fundamentals did not change. Consequently, we could observe reasonably good interest for nearby shipments.
This was further fuelled by demand for prompt shipments of non – EUDR material. In view of the extended transit time from the Far East to Europe the window to ship rubber without EUDR documentation is closing now.
In this respect the changes to the HS codes under the EUDR have now been officially confirmed. HS codes 4010 and 4016 are no longer within the scope of the EUDR.
