The natural rubber market started the week with some profit-taking ahead of the long public holidays in China, leading to a period of consolidation on Monday and Tuesday.

From Wednesday onwards, prices recovered and reached a new high. The market maintained its positive momentum throughout the remainder of the week, with prices continuing to edge higher. Persistent heavy rainfall in Thailand and Vietnam continues to put pressure on production and raw material availability.

The ongoing weather conditions remain a key factor for the market and are contributing to continued supply concerns.

VRG scheduled a meeting over the weekend to discuss upcoming shipments, raw material allocation as well as volume commitments for next year.
